

## ALTERNATING ELECTRONIC FLASHER ETDTSS50

Congratulations! You are now the proud owner of the most technically advanced true 100% Solid State Alternating Flasher System in the market today. Add to it our never ending commitment to quality, this new flasher system will provide you with years of dependable trouble free service.

A properly installed ETDTSS50 will alternate a set of lights at a constant flash rate of 50 flashes per minute.\*

### INSTALLATION

**MOUNTING:** Mount the flasher in a convenient location.

**GREEN WIRE:** Connect to a convenient reliable ground.

#### NOTE

Always connect the green wire to ground **FIRST** when installing and disconnect **LAST** when removing!

**BLUE AND YELLOW WIRE:** Connect the blue wire to the HOT lead of one deck or grille light. Connect the yellow wire to the HOT lead of the other deck or grille light.

**RED WIRE:** Connect to a powered switch. This switch will only require 1/4 amp to activate the flasher.

**WHITE WIRE:** Connect through a fuse directly to the positive post of the battery or other high current power source. We recommend the use of a fuse **ONLY** - **DO NOT CONNECT THE FLASHER SYSTEM TO A CIRCUIT BREAKER OR FUSIBLE LINK.**

#### NOTE

Welding on ANY vehicle creates voltage spikes that may destroy this flasher system and void its warranty. Disconnect ALL connections before welding on the vehicle or frame or wait to install the flasher after welding is completed.

Ensure lights used are properly grounded. **DO NOT** rely on the mounting bolt alone for ground connection.
