For over 27 years, SoundOff Signal has been a symbol of bright lights, safety, quality and performance.

We take pride in engineering trusted products for the nation's first responders. Every light, every siren, every control system we produce comes with our fundamental promise of reliability, innovation and excellence.

We stand for the first responder community - from urban fleets, to rural towns and anywhere in-between - we make products to brighten your presence and showcase safety.

Features

- At only one inch thick, mpower is fifty percent thinner than its leading competitors
- Silicone ClearDuty® molded one-piece housing and optic design delivers advantages over conventional polycarbonate lenses:
 - A smaller footprint with maximized candela output
 - Greater resistance to gravel pitting, scratching or cracking
 - Improved sealing to prevent water from entering light
 - Higher UV and thermal stability to prevent lens from yellowing over time

Features: Under Mirror Mount

- Light includes 0, 5, 10 and 15 degree mounting wedges and foam gasket
- The first light of its kind to offer critical intersection warning and side warning
- Light is based upon problem solving research - 30% of all emergency vehicle crashes are likely to occur at dangerous intersections
- Unique under-mirror mount simplifies installation - labor saving light is much easier to install than traditional front mirror skull mounts - no mirrors to work behind or around
- Light can be surface mounted to any flat area on any type of vehicle - elevate your safety and visibility by mounting to the headache rack or body of the vehicle wherever additional lighting is needed
- Features cruise mode for steady burn if desired
- Steady-burn white can be specified as a means of providing additional side/alley lighting

Features: Surface Mount

- No other light offers 180 degree output - specially designed reflector amplifies and throws the light at the perfect angle to increase visibility at intersections
- Includes surface mount light in your choice of LED and housing colors, neoprene gasket and mounting hardware for installation
- Patented design, the first light of its kind to offer critical intersection warning and side warning illumination now available with surface mount capabilities

bluePRINT[®] 3 Control System

Take Total Control of Your Warning System!

To meet the challenges emergency vehicles face on today's roadways, SoundOff Signal has developed bluePRINT, the industry's most complete, most capable Intelligent Control System. Networked, programmable and logic-driven, bluePRINT enhances safety by automating emergency lighting and siren functions, reducing the need for operator input.

A bluePRINT-equipped vehicle is state-of-the-art and uses vehicle data and other inputs to inform and modify the warning system profile in real time. Agencies benefit with improved policy and law compliance, situation-specific warning profiles, automatic dimming and flash rate adjustments and diagnostics.

bluePRINT provides benefits for installers as well. Up fits become more standardized, reliability is improved and accessories like relays, diodes, timers and fuse blocks are often eliminated. bluePRINT's LINK, a plug-n-play CANbus interface, protects vehicle circuit integrity by eliminating the time and risk of modifying original vehicle wiring.

SoundOff lightbars integrate fully and easily into the system. Secondary lights become remote units, as the system will control their functions, including cruise, low power and flash patterns. Multi-color lights are fully controllable with bluePRINT. Accessories, like cameras, radios and radars, can be powered through bluePRINT to eliminate parasitic drains and provide load shed protection.

bluePRINT 2 and 3 Central Controller

bluePRINT 3 central controller requires the bluePRINT 3 app

Multi-Function Siren Features

- Button or knob options available
- 100 or 200 watt options available

Dual-Tone Siren Feature

- 100 or 200 watt options available

Input and Remote Nodes

Handheld Control

Remote Control Panel Features

- Button or knob remote options available
- Fifteen programmable buttons

100 Watt Siren (sealed)

Powerful Inputs and Outputs

Scalable and capable, bluePRINT offers up to 82 outputs, 96 inputs, 24 virtual inputs, and 450 amps of power distribution to handle any task. More than 50 vehicle CANbus signals are available to work with. As many as five Remote Nodes can be used to simplify and consolidate wiring. bluePRINT can even run two control heads to provide added flexibility.

Plan > Prioritize > Program

bluePRINT's Windows-based app allows you to configure your system, name and assign input/output relationships, create logic functions and prioritize system actions with the click of a mouse. Once configured, the program is simply uploaded to bluePRINT allowing for rapid multi-vehicle cloning. Full software support including training is available.

Diagnostics

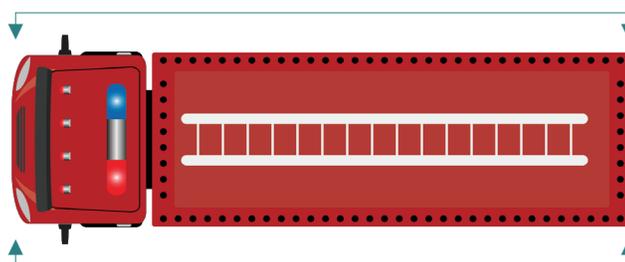

Real-time Windows PC-to-vehicle diagnostic connection provides immediate input/output and CANbus status. Technicians can view current and historical faults, reset outputs, and monitor current. Additionally, all inputs and outputs can be toggled on or off for validation testing of programmed functions and connected devices.

Sync for Safety

SoundOff Signal's exclusive Sync technology provides true multi-vehicle flash pattern synchronization to improve warning messages. No ongoing fees, no need for connectivity and minimal hardware gets you up and running quickly. See page 49 for additional details.

bluePRINT[®] 3 Link[®] Module

When used with the bluePRINT controller, the bluePRINT Link module allows access to a variety of the vehicle's data parameters.

Module

Central Cable

Vehicle Specific Network Cable

Features

- By incorporating the bluePRINT Link module into the vehicle, the need to splice into discrete wire triggers can be greatly reduced
- Reduces time that is required to install a bluePRINT system into a vehicle
- Increases system reliability due to issues when wiring into discrete triggers
- Provides access to vehicle parameters that may not have been available via discrete wires, such as door status, battery voltage, and vehicle speed, to name a few
- Vehicle parameters can be mapped as input triggers to automate the control of vehicle lighting

bluePRINT Sync®

GPS Module and Antenna **ENGSYM01**

Antenna Service Part **ENGSYAT01**

Features and Requirements

What is bluePRINT Sync?

- bluePRINT Sync is an add-on component for the bluePRINT 3 System
- It provides true warning system coordination between vehicles
- Sync-equipped emergency vehicles will automatically flash in perfect timing when using the same pattern
- Because of bluePRINT's flexibility in programming, single and multi-color patterns can be set to match or be different based on environmental and operator variances
- When matched with bluePRINT LINK, Sync becomes the industry's first lighting sync system that can be programmed to automatically change colors, patterns or intensities based on input from the vehicle such as speed, and ambient lighting

Why use bluePRINT Sync?

- Improved warning messages. Slow, medium or fast patterns are much more effective and noticeable when multiple vehicles are utilizing synchronized patterns
- Reduced distractions and confusion of multiple, random flashing lights. Approaching drivers can better judge the emergency vehicle's status
- Improved work area visibility for officers and other roadway users
- Enhanced professional image of all warning or response vehicles on a scene
- Enhanced tactical presence of police by calming scenes and implying control

How Does it Work?

- bluePRINT Sync utilizes GPS technology to keep patterns in sync. Car-to-Car communication is not necessary with this technology
- Using GPS technology means there is no required distance for vehicles to synchronize patterns. They are always in sync, no matter how far they are from one another
- Since bluePRINT Sync works in the background to synchronize patterns, there are ideas that should be discussed with bluePRINT users and programmers regarding the best way to utilize the technology
- Each bluePRINT Sync kit includes a Sync Module, GPS Antenna, Ethernet Splitter and 3' ethernet cable

Hardware Requirements	Only a bluePRINT Central Controller with firmware version 3.08 and newer is required for use with bluePRINT Sync
Software Requirements	All programming for bluePRINT require access to the bluePRINT Configuration Software. Sync is supported in bluePRINT version 3.8.2 and newer
Antenna Recommendation	SoundOff Signal only offers technical GPS support using the included GPS antenna Using an antenna other than the recommended can possibly damage the bluePRINT Sync module. Damage to the Sync module from improper antenna usage is not covered

SoundOff Signal Control System

Eight Button Controller with Slide Switch ETCPRSP01

Features

- Similar to the 400 Series remote PA control panel without having the PA tone control
- Retains radio rebroadcast and PA features for applications that do not require tone controls
- Provides up to seven 10 amp and three 20 amp outputs with internal fuses for powering solenoids (amplifier required) or supplying power and signaling to other onboard peripherals (printer, GPS, etc.)
- Built-in protection against over/under voltage, short circuit and reverse polarity
- Features an eight-second buzzer alert to notify users that the level or auxiliary buttons are activated
- Cabling setup is the same as the 400 PA Series allowing for easy swap-in
- Dimmable green LED backlighting
- Dual control panel capability

500 Series Remote, Console and Handheld Sirens

Coming Soon!

Features

- 200 watt sirens feature dual-tone capability to deliver two siren tones at once to provide officers with extreme “traffic moving” capability
- Designed with extra large buttons with appropriate spacing to eliminate buttons to be accidentally pressed
- Provides up to nine 10 amp, three 20 amp and nine 5 amp outputs with internal fuses for powering solenoids (i.e. gun lock) or supplying power and signaling to other on board peripherals (printer, radar, GPS, etc.) Up to 15 of these outputs are solid-state and flashable
- Nine discrete wire inputs
- Built-in protection against over/under voltage, short circuit and reverse polarity
- Building-in bluePRINT® programmability with input and output expansion modules, timers and load shedding
- Multiple lightbar connections with integrated breakout box functionality
- USB programming with improved diagnostic capabilities
- Compatible with all 400 Series siren control panels

Remote Sirens (with remote conversion kit)

- Removable microphone with quarter inch plug (remote with knob)
- Officers value the sound intensity of the dual-tone feature “fooling” perpetrators into believing multiple police vehicles are in pursuit
- Hands-free feature allow siren tones to be cycled or cancelled by pressing horn (horn-ring circuit must be connected)

Console Sirens (shown)

- Unlike other competitors, nERGY offers two console versions. One version has a five position rotary switch and the other features a four push button switch
- Horn ring scroll provides ability to quickly change tones with the tap of the horn

Handheld Siren

- Provides unique advantages unlike any product on the market today: LED, alley and arrow handheld switch indicators for convenient viewing and extensive programmability
- Horn ring scroll provides ability to quickly change tones with the tap of the horn

990 **ETSP990**

993 with Power Pursuit Buttons **ETSP993**

Features: 990

- Offers six Ryno-Tuf durable push buttons that are fully programmable with 60 amp maximum output with one push button that can be set as an eight second timed momentary if needed
- Model offers high speed action, low current draw and increased reliability with efficient digital technology
- Switches can be console mounted if desired
- Compact, slim design with self performing diagnostics at power-up to ensure optimum performance

Features: 993

- Offers 11 programmable buttons, nine total Ryno-Tuf push buttons, three power pursuit with two hidden "discreet" membrane buttons located behind the SoundOff Signal® logo
- Configure the power pursuit buttons to operate any combination of the 6 remaining push buttons automatically, eliminating hours of tedious wiring
- Two hidden membrane switches can be programmed for discreet functions of your choice such as timed gun lock
- Model offers high speed action, low current draw and increased reliability with efficient digital technology

- Flashing ring and reverse (Charger) or flashing ring (Durango)
- Outer ring and reverse alternate with center ring (Charger) or outer ring alternate with center ring (Durango)
- Running lights and headlights (on will not override flasher)
- Easy installation with plug-in connectors
- Module has isolating diodes for the brake and reverse wire that are required for many new vehicles
- For use with vehicles that have the negative post of the battery connected to the chassis of the vehicle
- Durable and non-corrosive ABS plastic housing
- Alternating red and white light creates an effective rear warning signal to greatly reduce rear and collisions
- 100% solid state, potted design for long-lasting, reliable performance
- 10-16 Vdc, 5 Amp output

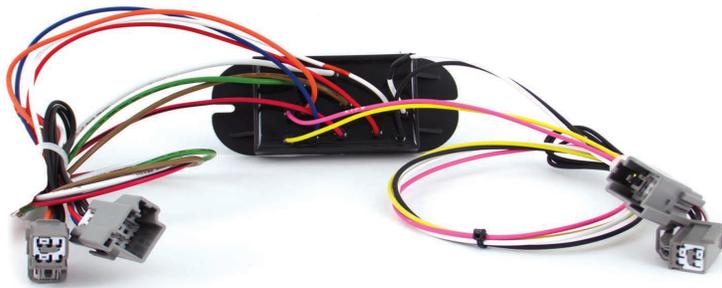

Dodge Ram, 2018-2020 **ETTFK01**

Feature

- Flashing reverse
- Passenger side reverse alternate with driver side reverse
- Easy installation with plug-in connectors
- Module has isolating diodes for the brake and reverse wire; required for many new vehicles
- For use with vehicles that have negative post of the battery connected to the chassis
- Durable and non-corrosive ABS plastic housing
- Alternating red and white light creates an effective rear warning signal to greatly reduce rear and collisions

- For use with vehicles that have the negative post of the battery connected to the chassis of the vehicle
- Provides an additional output for deck lights
- Alternating red and white light creates an effective rear warning signal to greatly reduce rear end collisions
- 100% solid state, potted design for long-lasting, reliable performance

Opticom™ Preemption LED Module

Opticom™ is a registered trademark of Global Traffic Technologies, LLC.

Infrared High Priority **EGTTE794H**

Features

- Provides emergency vehicle preemption to all intersections equipped with Opticom Infrared systems. Module generates a series of pulses in the infrared wavelength to allow preemption for emergency vehicles
- High efficiency LEDs require up to 90% less electrical power than conventional emitters, conserving power for other onboard emergency equipment. LED technology provides a higher level of consistent performance over the life of the emitter

Ignition Security Systems

Heavy Duty Model **ETISSO-06+**

Standard Model **ETISSO-07+**

Features: Heavy Duty Model

- Designed to be compatible with many different types of vehicles
- For heavy duty vehicles that require higher current draw through the ignition switch
- Allows the vehicle to stay running when the key is removed from the ignition switch
- Brake pedal and shift lever movement disables the ignition security system and stops the engine (sounds horn if connected)
- Over-ride simply deactivates by turning the key to the run position and depressing brake
- Additional relay output provides normally open or normally closed contact for starter disable, gun lock disable, camera record, etc.
- Optional horn or siren alarm

Features: Standard Model

- Easy to install and designed to be compatible with a variety of vehicles
- Connectors allow for quick replacement/removal of the ignition security system
- Allows the vehicle to stay running when the key is removed from the ignition switch
- Brake pedal and shift lever movement disables the ignition security system and stops the engine (sounds horn if connected)
- Override simply deactivates by turning the key to the run position and depressing brake
- Automatic low voltage detection will activate the horn to provide notification of vehicle problems
- Additional universal output provides normally open or normally closed contact for starter disable, gun lock disable, camera record, etc.

43" Length, 10-16 Vdc	ECVCSLLED43	43" Length, 10-30 Vdc	ECVCSLLED43-30

Features

- Streamlined, low amp draw LED lighting
- Easy installation - make a simple 2-wire electrical connection
- Glossy white powder coated aluminum housing with a polycarbonate lens
- Includes 2-wire lead with a 18" length

Flush Mount

12" Length, 10-16 Vdc	ECVCLLED12
24" Length, 10-16 Vdc	ECVCLLED24
36" Length, 10-16 Vdc	ECVCLLED36
42" Length, 10-16 Vdc	ECVCLLED42

Features

- Specially engineered lens optic directs light away from viewer's eye
- Glossy white powder coated aluminum housing with a polycarbonate lens
- Includes 2-wire lead with a 18" length and end/trim caps

Strip, 90 Degree Corner and Flush Mounts

CURRENT DRAW 0.4 Amp per 12" length

Features: 500 and 1000 Lumen

- Intense and bright, built for demanding environments
- Certified to IP67 specifications for rigorous dust and water immersion testing
- Rated to last 30,000+ hours for long-lasting, reliable and bright white light source
- Low maintenance and reduced operating costs

Features: 1400 Lumen

- Protection against reverse polarity and load dump
- LEDs offer better energy efficiency and uses 75% less energy than sealed beams
- Visual clarity, crystal clear polycarbonate lenses with extremely bright, white LEDs illuminate the darkest of work areas
- Lasts for years with 50 times the lifespan of sealed beam halogens and 10 times that of HID bulbs (30,000+ hours of use)
