

Vehicle-specific harnesses available to meet your specific fleet needs

FEATURES

- Allows access to a variety of vehicle's data parameters some of which includes speed, service brakes, doors, transmission range, head lamps and door locksto name a few - when used with the bluePRINT central controller
- Use with our bluePRINT3 app to configure the system - this app was developed specifically for use with the bluePRINT Link module
- Reduces splicing into the vehicle's wiring - possibly even eliminating the need entirely
- Reduces install time
- Increases system reliability
